

Project

Instructions:

1. Submit the project by 10 Nov
 2. One person from each group can submit the project with the following information,
 - Modified code
 - Project report: write the list of changes (maximum half page) you have done for code. And, include plots, if any
-

1. Implement Cell list algorithm in the given MD code and check for its performance by plotting the CPU/wall time for different system size. Also include a note on changes in wall time before and after implementing the neighbour lists.
